

SSL 证书- Nginx

设置 http 跳转到 https

设置 http 跳转到 https

nginx 配置 SSL 证书之后，配置如下：

```
server {
listen 80 default backlog=2048;
listen 443;
server_name domain.com;
root /var/www/html;
ssl on;
ssl_certificate /etc/nginx/certs/domain.crt;
ssl_certificate_key /etc/nginx/certs/server.key;
}
```

http 访问的时候，报错如下：

400 Bad Request

The plain HTTP request was sent to HTTPS port. Sorry for the inconvenience.

Please report this message and include the following information to us.

Thank you very much!

说是 http 的请求被发送到 https 的端口上去了，所以才会出现这样的问题。

把 `ssl on;` 这行去掉，`ssl` 写在 443 端口后面。这样 http 和 https 的链接都可以用，完美解决。

```
server {
listen 80 default backlog=2048;
listen 443 ssl;
server_name domain.com;
root /var/www/html;
# ssl on;
ssl_certificate /etc/nginx/certs/domain.crt;
ssl_certificate_key /etc/nginx/certs/server.key;
}
```
